| A. | Fill in the blanks using the hints given below:                                  |   |                     |                  |                   |             |
|    | Hints: 3D camera, output device, radio frequency, input devices, Storage devices |   |                     |                  |                   |             |
|    | 1.   | A comput  | er displays the res | ults of the proc | essed data throug | gh the      |
|    | 2.   |   | are used to sto     | ore the data.    |                   |             |
|    | 3.   | 3is a real sense device that can measure distances.         |                     |                  |                   |             |
|    | 4.   | . A computer accepts data and instructions from you through |                     |                  |                   |             |
|    | 5.   | . Wireless devices work with the help of                    |                     |                  |                   |             |
| В. | Write 'T' for true and 'F' for false.  |   |                     |                  |                   |             |
|    | 1.   | Mouse is t  | he brain of a com   | outer.           |                   | *********** |
|    | 2.   | Mouse is a  | an internal hardwa  | re component     | of computer.      |             |
|    | 3.   | . We cannot touch hardware parts.                           |                     |                  |                   |             |
|    | 4.   | Keyboard  | performs all the c  | alculations.     |                   |             |
|    | 5.   | Micropho  | ne is an input devi | ice.             |                   |             |
| C. | Identify the following as input and output devices:                              |   |                     |                  |                   |             |
|    | 1.   |   | 35.73               | 2.               |                   |             |
|    |  | •••••   | •••••               |                  | •••••             | •••••       |
|    | 3.   |   |                     | 4.               |                   |             |
|    |  |   |                     |                  |                   |             |
