## **INTRODUCTION TO MS ACCESS 2010**

Chapter-3

## A. Read the clues and answer the following:

- 1. It is a type of database that contains records having small number of fields without any structured relationship between them.
- 2. It is a type of database that stores data in several tables and links those tables together to get a common piece of information.
- He gave a set of thirteen rules (Codd's rules) to define a Relational Database Management System.
- 4. It is a group of related data organised in columns and rows in a database.
- 5. It is a unique field by which the records are uniquely identified in a table.

## B. Label the following:
