INTRODUCTION TO SMALL BASIC

Chapter-8

A. Fill in the blanks using the hints given below:

Hints: Relational, Small Basic, Read(), Intelligence

- enables you to do text-based programming using simple English like commands.
- Small Basic has a feature called that helps you to type your programs faster.
- The operators are used to compare the values of the two operands and returns Boolean value true or false accordingly.
- The statement is used to read a string input from the Text Window.

B. Write 'T' for true and 'F' for false.

- BASIC stands for Beginners All-purpose Symbolic Instruction Code.
- Logical operators are used to perform arithmetic operations between two operands.
- Statements are the reserved words which cannot be used as a variable.
- Boolean variables are used to make decisions.

C. Write a program to convert temperature from fahrenheit to degree celsius.
