HTML—AN INTRODUCTION

Chapter-7

A. Read the clues and answer the following:

1. It includes both opening and closing tags.
2. It is a symbol used to close a tag.
3. It is an attribute used to define a colour to the background of your web page.
4. It is a tag that defines the header area of your web page.
5. It is a property that provides some additional information about a tag.

B. Circle the correct option.

1. HTML was redesigned by Tim Berners Lee / Edward Jennings.
2. Websites consist of millions of pages / tags.
3. Nesting of tags means that you can start a new tag before / after closing the previous tag.
4. The markup / empty tags tell the Web browser how to display the web page.
5. The <BODY> / <HEAD> tag contains the title of the document along with general information.

C. Write the tag used to:

1. Start a paragraph
2. Start a new line
3. Add a horizontal line
4. Apply the bold effect
5. Turn the enclosed text into superscript

D. Identify the types of tags in the following example and write the name below:

<TagName> content </TagName>
