DATABASE AND DBMS—AN INTRODUCTION

Chapter-7

A. Read the clues and answer the following:

1. It is a type of database that contains records having small number of fields without any structured relationship between them.
2. It is a type of database that stores data in several tables and links those tables together to get a common piece of information.
3. He gave a set of thirteen rules (Codd's rules) to define a Relational Database Management System.
4. It is a group of related data organised in columns and rows in a database.
5. It is a unique field by which the records are uniquely identified in a table.

B. Label the following:
