INPUT AND OUTPUT IN C++

Chapter-4

A. Answer the following questions:

1. Why we use comments in a program?
2. What are escape sequences? Give two examples.
3. Name two objects which are used to take input and display output to the screen.

B. Guess the names of the following:

1. I am an object used to display the output on the monitor in a c++ program.
2. I am an escape sequence used to add vertical tab.
3. I am a symbol which when appears in beginning of a statement makes it a comment.
4. I allow user to add multiline comments.

C. What will be the output of the following codes:

1.

```
#include<iostream.h>
#include<conio.h>
void main()
{
cout<<"Hello everyone\n\n";
cout<<"My name is Taisha";
cout <<"I love my mother";
}
```
2.

```
void main()
{
cout<<"The \\n is used to add\n a line break.\n";
cout<<"The \\t is used to add\t horizontal tab.\n";
cout<<"1\n1 1\n1 1 1\n1 1 1 1\n";
}
```
3.

```
#include<iostream.h>
#include<conio.h>
void main()
{
cout<<"Enter your roll no.:\n\n";
cin>>roll";
cout <<"Your roll no. is:",roll;
}
```
