B. Write 'T' for true and 'F' for false.

- Layers tab is used to move the Layers palette around the GIMP window.
- Filters cannot applied to an entire image or to a part of the image.
- You can combine all the layers of an image to make one layer by flattening layers.
- To change the position of layers you can use the Raise this layer button from the Layers palette.
- Lock Pixel hides the image on the layer as well as the eye icon.
- The Layers palette displays all layers.

C. Write steps to flatten layers.

Step 1

Step 2
