## CONDITIONAL STATEMENTS IN SMALL BASIC

### Chapter-4

#### A. Write 'T' for true and 'F' for false.

1. The If-Then statement is the simplest conditional statement. ....
2. If-Then Else statement also changes the flow of the program by letting the control branch to a statement that appears earlier or later in the program. ....
3. An If statement ends with the keyword EndIf. ....
4. Goto statement is the selection-based statement. ....
5. Small Basic provides looping statement called If-Then Else. ....

#### B. Write a Program to print numbers from 1 to 20, if the counter exceeds 20, then print 'You are out of the limit'.
