Worksheet 1

INTRODUCTION TO AI

Unit-1

1. Define the following:
   a. Deep Learning
   b. Labelled data
   c. Expert Systems

2. List any 2 features of machine learning.

3. Differentiate between traditional programming and machine learning with the help of a diagram.

4. Mention any 2 areas where supervised, unsupervised and reinforcement learning is used.

5. Explain the purpose of the hidden layer in the neural network.

6. What is data? Name the 2 types of data.
