- Pivot Animator** is a free and simple tool to make animations with stick figures. A stick figure is a drawing of a person made with just lines and circles.
 - Saving an animation project means storing your animation project on your computer. Saved projects can be opened later or shared with others.
 - Exporting an animation means turning your project into a finished file, like a GIF or video. This file can be watched on other devices or shared with others. When you export, the animation is saved in a way that doesn't need the software to play. You can use it outside the program.
- Gunjan should use the Loop option in Pivot Animator to play her animation repeatedly without clicking the Play button each time.
 - Segment Handle
