APP DEVELOPMENT

A. Tick (✓) the correct option.

1. Which of the following uses apps?

a. Hand-held devices

☐

b. Laptops

☐

c. Desktop

☐

d. None of these

☐

2. developed Android.

a. Google

☐

b. Playstore

☐

c. Apple Inc.

☐

d. Microsoft

☐

3. are platform dependent apps.

a. Native apps

☐

b. Hybrid apps

☐

c. Web apps

☐

d. None of these

☐

4. is not a gaming app.

a. X

☐

b. PUBG

☐

c. Angry Birds

☐

d. Candy Crush

☐

5. Which of the following is an appstore for android devices?

a. App Store

☐

b. Microsoft Store

☐

c. Play Store

☐

d. None of these

☐

B. Write 'T' for true and 'F' for false.

1. Apps were not developed for desktops.

.....

2. Notepad is an example of desktop application.

.....

3. Web applications are typically developed using HTML and CSS.

.....

4. Mobile apps cannot be used without internet connectivity.

.....

5. Block editor view contains all the components required to design an application.

.....

Class: _____ Section: _____ Date: _____

APP DEVELOPMENT

A. Fill in the blanks.

- Hybrid apps created by combining the features of and apps.
- The commonly used Android Emulators are
- Android is an operating system for devices developed by Google.
- To use a, you need to install it first.

B. Answer the following questions:

- What is an application?
.....
- Define hybrid apps.
.....
- State a difference between a web app and a native app.
.....
- State a benefit of e-commerce app.
.....

C. Guess who am I?

- I am an app store developed by Google.
- I am an app store developed by Apple Inc.
- I am a free app development tool, provided by Google.
- I am also known as business apps.

KRITA—IMAGE EDITING

A. Tick (✓) the correct option.

- Which drop-down list is used to select the face of the font?

a. Font Size	<input type="checkbox"/>	b. Font Family	<input type="checkbox"/>
c. Letter Spacing	<input type="checkbox"/>	d. Font Anchoring	<input type="checkbox"/>
- Which of the following is the place where you create and edit an image?

a. Toolbox	<input type="checkbox"/>	b. Workspace	<input type="checkbox"/>
c. Menu Bar	<input type="checkbox"/>	d. Toolbar	<input type="checkbox"/>
- Which of the following displays the zoom level of the workspace?

a. Resolution	<input type="checkbox"/>	b. Status bar	<input type="checkbox"/>
c. Toolbar	<input type="checkbox"/>	d. Menu Bar	<input type="checkbox"/>

B. Fill in the blanks.

- Resolution is used to specify the number of per inch.
- Krita is a free and graphics editor.
- By default, the name given to the file is
- The layers can be added or while working on the file.

C. Match the following:

- | | |
|--|---------------------------------|
| 1.  | a. Similar Color Selection Tool |
| 2.  | b. Contiguous Selection Tool |
| 3.  | c. Freehand Selection Tool |
| 4.  | d. Rectangular Selection Tool |

ADVANCED FEATURES OF EXCEL 2016

A. Read the clues and answer the following:

1. It is used to highlight cells that contain values greater than a particular value.
2. It is a way to arrange the data in ascending or descending order.
3. This command allows you to calculate group-wise sum.
4. It is a shortcut key used to print the worksheet.

B. Circle the correct option.

1. The subtotal command is available under (Insert tab /Outline group).
2. The (Conditional / Optional) Formatting option is available in Styles group under the Home tab.
3. The (Highlight Cells Rules / Data Bars) option is selected when you want to add data bars to the cells having numeric data.
4. The filters once applied (can / cannot) be easily removed.

C. Write the name of the command used to:

1. Add colour schemes to all selected cells slowly varying from top to bottom items.
.....
2. Add icon sets to show which cells are acceptable, which are moderate and which need attention.
.....
3. Add data bars to the cells having numeric data.

TYPES OF AI

A. Tick (✓) the correct option.

- What is the branch of computer science that focuses on developing machines which can think and work like human beings?

a. Human Intelligence	<input type="checkbox"/>	b. Natural Intelligence	<input type="checkbox"/>
c. Artificial Intelligence	<input type="checkbox"/>	d. None of these	<input type="checkbox"/>
- AI can be divided into how many categories?

a. 1	<input type="checkbox"/>	b. 2	<input type="checkbox"/>
c. 3	<input type="checkbox"/>	d. 4	<input type="checkbox"/>
- Which category of AI can perform dedicated tasks with intelligence?

a. Weak AI	<input type="checkbox"/>	b. Strong AI	<input type="checkbox"/>
c. Super AI	<input type="checkbox"/>	d. None of these	<input type="checkbox"/>
- Which category of AI machine would be smarter than an average human being and would also understand human emotions?

a. Weak AI	<input type="checkbox"/>	b. Strong AI	<input type="checkbox"/>
c. Super AI	<input type="checkbox"/>	d. None of these	<input type="checkbox"/>
- Which of the following is an example of Weak AI?

a. Siri	<input type="checkbox"/>	b. Chatbots	<input type="checkbox"/>
c. IBM Watson	<input type="checkbox"/>	d. All of these	<input type="checkbox"/>

B. Define the following:

- Artificial Intelligence

.....

- Weak AI

.....

- Strong AI

.....

TYPES OF AI

A. Fill in the blanks.

- is the branch of computer science that focuses on developing machines which can think and work like human beings.
- Machine's is created by the humans.
- Siri, Google Assistant, and chatbots are examples of AI.
- Machines that can think, learn, and solve problems like humans are part of AI.
- Machines with intelligence would be able to understand human emotions.

B. State whether these statements are true or false.

- Weak AI cannot solve multiple unrelated problems.
- AI refers to the ability of machines to perform cognitive tasks like thinking, perceiving, learning, problem solving and decision making.
- AI can be classified into 4 categories which are based on the functionality of AI applications.
- Narrow AI performs dedicated tasks with intelligence.
- Weak AI machines have human like intelligence.

C. Assertion and reasoning based question.

Assertion (A): Machines can process huge volumes of data quickly and with accuracy.

Reason (R): Machine learn from information provided to them and through regular training.

- Both A and R are correct and R is the correct explanation of A.
- Both A and R are correct but R is NOT the correct explanation of A.
- A is correct but R is not correct.
- A is not correct but R is correct.

Select the correct answer from above options.
