REASONING AND ANALYSIS

Chapter-7

CLASS 2

A. Fill in the blanks using the hints given below:

Hints: hidden, below

1. Decoding is the process of converting a message to a meaningful text.
2. A number pyramid is built by adding the two numbers each space.

B. Write 'T' for true and 'F' for false.

1. In a number pyramid, the number in each space is the sum of the two numbers below it.
2. Decoding is the process of converting a hidden message into meaningful text.
3. In a number grid, each grid is replaced by the sum of the numbers in it.

C. Answer in one word.

1. What is the sum of 2 and 1 in a number pyramid?
2. How can you decode the message 132112?
3. If the bottom numbers in a number pyramid are 5 and 7, what number goes above them?
