## MORE ON GIMP

### A. Circle the correct option.

1. (Retouching / Correction) tools are used to improve the quality of the image by blurring, sharpening, smudging, dodging and burning the image.
2. (Burn/Blur Tool) is used to darken the existing colours of an image.
3. (Dodge/ Smudge Tool) is used to lighten the existing colours of an image.
4. (Smudge / Clone Tool) is used to show the image as the wet paint on the image has been spread by a finger.
5. (Healing / Sharpen) Tool is used to repair dark spots, scratches, etc., from the image.

### B. Label the GIMP Toolbox.

### C. Number the steps to use the Sharpen feature.

- Select the brush size and hardness from the Tool Options.
- Press and hold Ctrl key and then drag the mouse pointer over the area that you want to sharpen.
- Open an image.
- Release the Ctrl key.
- Click on the Blur/Sharpen Tool from the Toolbox.
