

ASSIGNMENT-22

Marks Obtained: _____

Student's Name: _____ Section: _____

Roll Number: _____ Date: _____

A. Fill in the blanks.

1. The amount of liquid a container can hold is called its _____.
2. The standard unit for measuring large quantities of liquid is _____.
3. To convert Litres into Millilitres, we multiply the number of Litres by _____.
4. The capacity of a small spoon of medicine is usually measured in _____.
5. 6 L 45 mL is equal to _____ mL.
6. To convert 4250 mL into Litres and Millilitres, we get _____ L and _____ mL.

B. Label True or False.

1. The capacity of a container depends on its shape and size. _____
2. 3000 mL is the same as 30 Litres. _____
3. A standard eyedropper usually holds liquid measured in millilitres. _____
4. The capacity of a bucket is measured in millilitres _____
5. 5 L 75 mL is written as 5075 mL. _____

C. Match the following.

Column I	Column II
1. Standard unit of capacity	(a) 750 mL
2. 1 litre	(b) Millilitres
3. 4 L 30 mL	(c) Four 250 mL
4. $\frac{3}{4}$ L	(d) 4030 mL
5. Capacity of a spoon	(e) Litre

D. Utilise Your Brain.

A bucket contains 12 L of water. It has a small leak that loses 250 mL of water every hour.

1. How much water will be left in the bucket after 4 hours?
2. How many hours will it take for the bucket to become completely empty?
