

Excel 2019

Excel 2019 is part of MS Office 2019 software suite. It comes with a colourful interface and many new features.

FEATURES OF EXCEL 2019

Excel 2019 provides several features which make Excel the first choice for professionals to quickly perform lengthy accounting and financial tasks, and take immediate decisions. Some of them are as follows:

- ★ **Maps Chart:** A new type of chart has been added under the **Insert** tab. It compare values and show categories across geographical regions. Use it when you have geographical regions in your data, like countries/regions, states, counties or postal codes.
