Worksheet

2

WEB SECURITY AND WORKPLACE SAFETY

Unit-4 | Chapter-7

1.   Write short notes on the following:

(a)   Cyber Threat

(b)   Program File Virus

(c)   DoS Attack

(d)   Spoofing

(e)   Identity Protection

(f)   Password

(g)   Falls and Slips

2.   Guess, who am I?

(a)   I am a type of malware that can replicate itself inside the system and thus occupy a huge memory space in the storage device.

(b)   I am the process of loading operating system in the primary memory from the boot sector.

(c)   I am a type of virus that infects the executable files of a program with the intention of causing permanent damage or making the program useless.

(d)   I am a type of spoofing that occurs when an attacker uses an e-mail message to trick a recipient into thinking that it came from a known and/or trusted source.

(e)   I am represented by a golden lock in the web browser's address bar signifies that the website is secure.

3.   Find the incorrect statement about Password and rewrite it correctly:

(a)   Keep the length of the password of at-least 8 characters, including a combination of numbers and symbols.

(b)   Use a combination of upper-case and lower-case letters.

(c)   Use same password for multiple purposes.

4.   Answer the following questions:

(a)   Explain any two fire safety measures.

(b)   Describe any two measures to prevent electrical accidents.

(c)   Write the names of any four types of emergencies.

(d)   List some general guidelines for workplace safety.

(e)   What is First aid? What is its importance?

(f)   What is a hazard?
